

Easy to use does not mean easy to manage. Support is never harder than when the developer has quit! The remote management features of this intuitive and easily managed software suite make it possible to recover files and data on any Win XP or Vista computer. Hard Drive Recovery is a powerful, fully featured and easy to manage data recovery product that supports all versions of Windows from Windows 95 and 98 to Windows XP and Vista. No longer required to patch and support dozens of different applications, the solutions provided by Hard Drive Recovery make it possible to recover on demand files and data on any Windows or Windows Server system using any version of FAT and NTFS file systems or any windows version. A simple install and configuration wizard will install the Easy Recovery Wizard and the Remote Management Wizard that provide all the necessary information and interfaces, make it possible to manage dozens of compatible devices and let Hard Drive Recovery run and recover data on any client Windows computer or server! The wizards support all 32-bit editions of Windows from Windows 95 to Windows XP and Vista, and many drivers and filters can be easily installed in a matter of seconds. The Easy Recovery Wizard is a powerful, easy to manage and reliable interface that supports: - Data recovery from any Windows computer or server. - Data recovery on any operating system, file system and version of Windows from Windows 95 to Windows XP and Vista. - Data recovery on any media storage device and peripheral. - All removable media such as memory cards, memory sticks, USB devices and digital cameras. - Any logical or partitioned disk. - RAID and Dynamic disks. - Database and other specialized solutions. - Native and Common files including all image, audio and video files, even digital photographs. - Advanced file searches, and a host of file system attributes. - Integrated search and navigation wizards. - File preview before and after recovery with the Live Preview feature. - Automatic corrections to missing media and dead file names. - Support for audio, images, videos and other binary files, as well as other media file formats from Microsoft Office to video files, digital pictures, EXIF data and other special data types. The Remote Management Wizard is a compact, powerful and easily managed tool that supports recovery on demand, from any computer or server with a Windows installation. The Remote Management Wizard provides the following functions: - Remotely control Hard Drive Recovery from any Windows or Windows Server computer or server running Windows XP or Vista. - Remotely control multiple recovered devices.

The free version of this product includes 3 tools: Diskpart, Disk Undelete, SmartSearch and the Trial Mode - Not enough? Fine! Go get the full version from the download section and get all the tools! Create your own interactive PDF easily and efficiently with the most advanced, easy-to-use and user friendly Adobe Acrobat tools! Try "PDF Creator & Editor" for free, just try it out now! Browse the web anonymously, download files at high speed, and share torrents. A variety of highly secure and convenient services like secure surfing and downloading files are supported by SAKULA. These services are offered by a well-known company SAKULA and are completely safe for use. Feel free to experience them! Test Version: 5.7.1.339 or later  
Browser: Internet Explorer 7.0 or later Verify to install the ActiveX control on your system. Click Install button to start the installation.
