## Pastextra Crack+ Free

Free WYSIWYG macro recorder. Macro recorder. Record common workflows in the form of repeating commands. Macro recorder will help you save your time. After recording, run the macro at any time by using the same keystrokes. WYSIWYG editor, macros, real-time recording. KEYMACRO interface: - Quick record button - Recording, Stop, Step, Undo, Repeat, Save buttons - Commands tab - Commands box - Command editor - Macro menu - Help button - Button panel - Tool bar - Buttons - Logs and file

What I don't like: - Automatic execution: You will always be asked if you want to start the command. - Easy to use: It's not so easy to use. It's what I like: - Easy to install: It's very easy to install. - Light: It's very light. - Useful: The program is useful. This is my opinion: - What I think: - It's what I think. - Why I think: - It's why I think. What is the tool's drawbacks? - Bug: There are no bugs. - Weak: It's not so strong. - Lightweight: It's not so heavy. - Lacks: It's not many lacks. - Price: It's too expensive. When do you use it? - Productivity: I use it when I need to do some work quickly. - Compose: It's what I use to compose text or photos in special ways. - Web: I use it when I want to add something to my websites. - Other: It's what I use for other purposes. What is the price? - Free: It's free. - Paid: It's paid. Can I use it on the web? - Yes: Yes, it can. - No: No, it can't. What's good about it? - Simplicity: It's very simple. - Helpful: It's very helpful. - Choice: There are many choices. What is the user's experience? - Good: It's good. - Poor: It's poor.

Comments: I use it because it's very simple, lightweight,

## What's New in the Pastextra?

Paste text, image, PDF, HTML and more directly to folders, drives, websites or desktop

Additional file details: Type: Web Size: 1.32 MB Release Date: 7/2/2015 Description: It is a simple and useful tool that gets integrated into the Windows Explorer context menu to help you paste text and photos directly to folders, thus automatically creating files.

Paste URLs, text and images directly to folders It comes in handy when you're in a hurry and wish to save important information as quickly as possible, instead of spending time to open programs, paste the content and then save the files. It's worth nothing, however, that it doesn't replace the default paste function, so you will still be able to regularly paste with Ctrl+V. Run as admin to integrate the tool with the context menu The setup installation means double-clicking the.exe from the downloaded archive and confirming the action to add Pastextra to the Explorer right-click menu. However, this requires administrator permissions because the tool has to modify some registry entries to get added to the context menu. Also, it doesn't work if you don't have .NET Framework installed. Newer Windows versions have this software framework built in, so you just have to make sure that it's enabled. Once the integration is over, you can right-click any folder to spot the new Pastextra entry. It's accompanied by an icon representing a yellow clipboard. Paste while right-clicking a folder or empty area inside a folder, root drive or the desktop The new entry also appears when right-clicking an empty, unselected area inside a folder, drive root or even the desktop. You can test its capabilities by copying text and images. When pasting text, the utility creates a plain text document (TXT). For images, it prefers the PNG format. Furthermore, if it identifies hyperlinks, it simply creates a shortcut (URL format), leading you to the website in question. In fact, this step is similar to how bookmarks are made by web browsers. File names with date and time stamps When it comes to the file names, Pastextra applies a seemingly random number. Upon closer inspection, though, you can see that it's actually a timestamp with the year, month, day, hour, minute and second. The downside is that all numbers are appended so it's a bit difficult to tell the date from the time. The application worked smoothly on Windows 10 in our tests. To uninstall it and remove it from the right-click menu, you just have to run

---

the same executable file (with admin rights) and confirm the action. Extra pasting functions Last but not least, the application can collaborate with wkhtmltopdf to provide some extra functionality. If you place wkhtmltopdf.exe near Pastextra.exe it

---

## System Requirements For Pastextra:
