GIMP (GNU Image Manipulation Program) The open source computer graphics program GIMP (GNU Image Manipulation Program) tries to emulate many of the features of Photoshop. As long as you're not trying to emulate the Photoshop "look," GIMP is a good option. Photoshop is one of the best graphic design applications, but GIMP is popular among many other users as a free, versatile image-manipulation application. Like Photoshop, it uses a layer-based system, and the interface is familiar to most graphic designers. GIMP comes in two versions: GIMP ToolKit and GIMP Studio. If you have access to one of these tools, you'll be set to do most of your photo manipulation work. If you don't, not to worry — there are plenty of free tutorials online that teach you how to do most of what you can do with this application.

Ask HN: Where do you watch movies on the train? - LevSoliver Hi HN,My commute to work is approximately 35 minutes and I would really appreciate some recommendations for movies that I could watch.If it is possible to connect via bluetooth, that would be perfect. (it is a commuter route and I always keep my phone in my pocket) ====== LevSoliver Some suggestions, given that some of these movies need to be carried around, namely The Father of my Children and Freedom: * The Children of Men (it's a bit of a dark movie) * In the Heart of the Sea (a pretty good movie) * Lost (an endearing one) * The Good German (to understand the aftermath of the Second World War) * Carrie (everyone should at least watch this for the acting) * Battle of Algiers (it's a bit of a dark movie, also) * All the President's Men (ask a kids what is the best script) ------ duozerk Oh and one more, "Lockout"... worth it! I'm good at war, and war has always been easy. I'm a real war buff, really. I've been playing Call of Duty since Call of Duty 1 came out. I own almost every game that's come out since then. My ranking on Activision's Blood Ops gun game at the time of writing is Fireman. I don't think I'm unique. A lot of kids and a lot of women want to be in war or at least think about it when they're kids. Because war is so enticing, there's a whole world of stories out there that are brilliantly executed – and there's a whole genre of games built around war. Those games couldn't be more different. You have war simulation games like Tom Clancy's Ghost Recon and Call of Duty, which are series that just keep feeding that hunger that has existed for a long time, and then we have colourful games like Red Orchestra, which deliberately play to that sense of humour.
