I'm using the following code to print the table: table { width: 500px; border-collapse: collapse; } thead { background: #ccc; } thead th { padding:.5em 1em; } tbody { background: #eee; } CatsDogs foofoo A: It's possible. Here's how: 1) In HTML, you need to specify the width for the tbody by specifying a width attribute in the td. (As you did with thead) CatsDogs foo foo 2) In CSS, add the following style: tbody { background: #eee; width:500

I am using the following code for the same. public void Shutdown(){ System.out.println("Shutting down..."); activemqProperties.setUseShutdown(true); activemq = (ActiveMQServer) activemqProperties.getServer(); activemq.destroy(); activemq.waitUntilStopped(); activemqProperties.setUseShutdown(false); System.out.println("Shutdown Complete..."); } When this method is executed with amq.destroy() it gives me the below exception. Exception in thread "main" org.apache.activemq.util.IOException: Failed to stop Broker at org.apache.activemq.broker.BrokerService.stop(BrokerService.java:404) at org.apache.activemq.command.ActiveMQServer.stop(ActiveMQServer.java:269) at org.apache.activemq.command.ActiveMQServer.waitUntilStopped(ActiveMQServer.java:313) at org.apache.activemq.command.ActiveMQServer.waitUntilStopped(ActiveMQServer.java:318) at myApp.main(myApp.java:27) The reason being that the "activemq.destroy()" is giving me an exception. I am using version 5.15.0 of ActiveMQ. Can anyone help me with this issue. A: One of the following is failing: ActiveMq Broker is running. Just stop the application and stop the broker. This is the easiest solution. Broker is not running. This
